

Sample Pricing (South Bent Bow 18x21-8')

- **Select Building Size**
 - In box next to the building size you want to put a 1. If ordering more than one then put in the number of buildings being purchased (2).
 - If you would like J-Trim on your building select the J-Trim box below the building you are buying. In the case above it would be 18x21 and J-Trim would be \$40 dollars.
- **Select the Leg Height**
 - Find the proper column based on building length. In this case it would be 21' Long. 5' legs are standard and are no additional charge. 6' thru 12' legs are available at additional cost.
 - Note: On 18' wide buildings corner braces are required. In our case corner braces would be another \$150 charge.
 - At this point you have priced an 18x21-8' Carport.
- **Closing in Both Sides Both Sides**
 - To close in your sides find your carport length and leg height, in our case it would be 21' long and has 8' legs. Looking at the price sheet it would cost us \$385 to cost in both sides. If you we would only want to close in one side we would take the \$385 cost and divide it by 2 to get \$192.50
- **Close in One End**
 - Find your building width, in our case it is 18' wide. Again find your leg height, on our sample building it is 8'. Our closed in one side price is \$550. If we choose to close in both sides we would put a 2 in the box and double the price. This makes our sample building Closed in Both Sides price \$1,100.
- **Accessories**
 - Our sample building now needs accessories such as doors, windows, rollup doors. Select each item you would like to have on your building. For our sample building let's add 1- 36" walk In Door. This would be \$225 on the price sheet.
 - Another option is windows so let's add 2-windows. Windows are \$175 each so 2 would be \$350.
 - Let's add an 8x7 rollup door to our sample building. 1-8x7 rollup door is \$375.

- **Anchoring Options**

- Under anchoring options there are choices to pick from based on what type of surface you are erecting your building.
- For our sample building let's say we are using Mobile Home Anchors. This means our building is going on the ground.
- Find the length of your building, in our sample building it would be 21' long. This means our MHA are \$100.

- **Total Pricing**

- We have just created a sample pricing sheet for an 18x21-8' with a sub total cost of \$4,720. This does not include tax and other charges that may be required in your area.

- **Other Building Pricing**

- Our sample building was created on a South Bent Bow Price Sheet. You can use the same methods of pricing on our A-Frame model and our 2x3 A-Frame with Vertical Option price sheets.
- If ordering a 2" x 3" 10' to 40' wide building or one of our Barn Buildings we recommend that you stop in and get a professional quote from one of our many dealers near you.
